

Specification of Thermoelectric Module

TEC1-12718

Performance Curves at $T_h=27\text{ }^\circ\text{C}$

Performance Curves at $T_h=50\text{ }^\circ\text{C}$

Standard Performance Graph $Q_c = f(DT)$

Standard Performance Graph $V = f(DT)$

Standard Performance Graph $Q_c = f(V)$

Specification of Thermoelectric Module

TEC1-12718

Performance Curves at Th=27 °C

Performance Curves at Th=50 °C

Standard Performance Graph COP = f(V) of DT ranged from 0 to 30 °C

Standard Performance Graph COP = f(V) of DT ranged from 40 to 60/70 °C

Remark: The coefficient of performance (COP) is the cooling power Q_c /Input power ($V \times I$).

Operation Caution

- Cold side of the module stucked on the object being cooled
- Hot side of the module mounted on a heat radiator
- Operation below I_{max} or V_{max}
- Work under DC

Note: All specifications subject to change without notice.
